## Fraction Addition in Words

three fourths plus four eighths =  $\frac{3}{4} + \frac{4}{8} = \frac{6}{8} + \frac{4}{8} = \frac{10}{8} = 1 \frac{2}{8} = 1 \frac{1}{4}$

three fourths plus five eighths =

two thirds plus five ninths =

one half plus one fourth =

three fourths plus four eighths =

three fourths plus five twelfths =

one third plus two ninths =

one half plus four sixths =

## Answers

three fourths plus four eighths =

$$\frac{3}{4} + \frac{4}{8} = \frac{6}{8} + \frac{4}{8} = \frac{10}{8} = 1 \frac{2}{8} = 1 \frac{1}{4}$$

three fourths plus five eighths =

$$\frac{3}{4} + \frac{5}{8} = \frac{6}{8} + \frac{5}{8} = \frac{11}{8} = 1 \frac{3}{8}$$

two thirds plus five ninths =

$$\frac{2}{3} + \frac{5}{9} = \frac{6}{9} + \frac{5}{9} = \frac{11}{9} = 1 \frac{2}{9}$$

one half plus one fourth =

$$\frac{1}{2} + \frac{1}{4} = \frac{2}{4} + \frac{1}{4} = \frac{3}{4}$$

three fourths plus four eighths =

$$\frac{3}{4} + \frac{4}{8} = \frac{6}{8} + \frac{4}{8} = \frac{10}{8} = 1 \frac{2}{8} = 1 \frac{1}{4}$$

three fourths plus five twelfths =

$$\frac{3}{4} + \frac{5}{12} = \frac{9}{12} + \frac{5}{12} = \frac{14}{12} = 1 \frac{2}{12} = 1 \frac{1}{6}$$

one third plus two ninths =

$$\frac{1}{3} + \frac{2}{9} = \frac{3}{9} + \frac{2}{9} = \frac{5}{9}$$

one half plus four sixths =

$$\frac{1}{2} + \frac{4}{6} = \frac{3}{6} + \frac{4}{6} = \frac{7}{6} = 1 \frac{1}{6}$$
