Fraction Addition in Words

three fourths plus three fourths = $\frac{3}{4} + \frac{3}{4} = \frac{6}{4} = 1 \frac{2}{4} = 1 \frac{1}{2}$

one half plus one half =

one fourth plus three fourths =

three fourths plus one fourth =

one half plus one half =

one fourth plus two fourths =

one half plus one half =

two thirds plus one third =

Answers

three fourths plus three fourths =

$$\frac{3}{4} + \frac{3}{4} = \frac{6}{4} = 1 \frac{2}{4} = 1 \frac{1}{2}$$

one half plus one half =

$$\frac{1}{2} + \frac{1}{2} = \frac{2}{2} = 1$$

one fourth plus three fourths =

$$\frac{1}{4} + \frac{3}{4} = \frac{4}{4} = 1$$

three fourths plus one fourth =

$$\frac{3}{4} + \frac{1}{4} = \frac{4}{4} = 1$$

one half plus one half =

$$\frac{1}{2} + \frac{1}{2} = \frac{2}{2} = 1$$

one fourth plus two fourths =

$$\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$$

one half plus one half =

$$\frac{1}{2} + \frac{1}{2} = \frac{2}{2} = 1$$

two thirds plus one third =

$$\frac{2}{3} + \frac{1}{3} = \frac{3}{3} = 1$$
