## Fraction Addition in Words

seven eighths plus five eighths =  $\frac{7}{8} + \frac{5}{8} = \frac{12}{8} = 1 \frac{4}{8} = 1 \frac{1}{2}$

one third plus one third =

six elevenths plus seven elevenths =

one fourth plus two fourths =

six tenths plus three tenths =

nine twelfths plus six twelfths =

five sixths plus four sixths =

one eighth plus seven eighths =

## Answers

seven eighths plus five eighths =

$$\frac{7}{8} + \frac{5}{8} = \frac{12}{8} = 1 \frac{4}{8} = 1 \frac{1}{2}$$

one third plus one third =

$$\frac{1}{3} + \frac{1}{3} = \frac{2}{3}$$

six elevenths plus seven elevenths =

$$\frac{6}{11} + \frac{7}{11} = \frac{13}{11} = 1 \frac{2}{11}$$

one fourth plus two fourths =

$$\frac{1}{4} + \frac{2}{4} = \frac{3}{4}$$

six tenths plus three tenths =

$$\frac{6}{10} + \frac{3}{10} = \frac{9}{10}$$

nine twelfths plus six twelfths =

$$\frac{9}{12} + \frac{6}{12} = \frac{15}{12} = 1 \frac{3}{12} = 1 \frac{1}{4}$$

five sixths plus four sixths =

$$\frac{5}{6} + \frac{4}{6} = \frac{9}{6} = 1 \frac{3}{6} = 1 \frac{1}{2}$$

one eighth plus seven eighths =

$$\frac{1}{8} + \frac{7}{8} = \frac{8}{8} = 1$$
