

Name: _____ Date: _____ Score: _____

Solve for the variable

$$9 \times y = 45$$

$$y = \boxed{5}$$

$$6 \times c = 18$$

$$c = \boxed{}$$

$$6 \times y = 36$$

$$y = \boxed{}$$

$$8 \times a = 32$$

$$a = \boxed{}$$

$$1 \times c = 6$$

$$c = \boxed{}$$

$$4 \times d = 44$$

$$d = \boxed{}$$

$$10 \times b = 120$$

$$b = \boxed{}$$

$$3 \times y = 24$$

$$y = \boxed{}$$

$$2 \times c = 4$$

$$c = \boxed{}$$

$$11 \times d = 66$$

$$d = \boxed{}$$

Answers

$$9 \quad x \quad y \quad = \quad 45 \qquad y \quad = \quad \boxed{5}$$

$$6 \quad x \quad c \quad = \quad 18 \qquad c \quad = \quad \boxed{3}$$

$$6 \quad x \quad y \quad = \quad 36 \qquad y \quad = \quad \boxed{6}$$

$$8 \quad x \quad a \quad = \quad 32 \qquad a \quad = \quad \boxed{4}$$

$$1 \quad x \quad c \quad = \quad 6 \qquad c \quad = \quad \boxed{6}$$

$$4 \quad x \quad d \quad = \quad 44 \qquad d \quad = \quad \boxed{11}$$

$$10 \quad x \quad b \quad = \quad 120 \qquad b \quad = \quad \boxed{12}$$

$$3 \quad x \quad y \quad = \quad 24 \qquad y \quad = \quad \boxed{8}$$

$$2 \quad x \quad c \quad = \quad 4 \qquad c \quad = \quad \boxed{2}$$

$$11 \quad x \quad d \quad = \quad 66 \qquad d \quad = \quad \boxed{6}$$
